This applies from Sedalia, No. 1, as shown in table. The first zone extends about fifty miles out from here, the second zone about 150 miles, the third about 400 miles, the fourth about 600 miles and the fifth about 1,000 miles.

Please ask your postmaster what zone you are in, make note of it and use this table.

Seeds, plants, and bulbs can be mailed, the rate of postage being 1c for each two ounces on packages weighing up to 8 ounces. Anything over 8 ounces takes the pound rate, that is, a package weighing 9 to 16 ounces takes the rate for one pound, and one weighing 17 to 12 ounces takes the rate for two pounds and so on. Therefore, when you want one pound of seed remit postage for two pounds as packing will increase the weight. There will only be two or three cents difference.

The weight limit of a single package to zones 1 and 2 is 50 pounds; to all others, 20 pounds.

We pay postage on all garden seeds in packets, ounces, one-fourth and one-half pounds and pounds. Add 5c per pound postage on grass seeds, seed grain and 5c per pint and 8c per quart for corn, peas, and beans, when wanted by mail.

Our New Year's Greeting

1884 32 YEARS OF SUCCESSFUL
SEED BUSINESS 1916

Nearly a third century ago the founders of this establishment made their first attempt in selling American Grown Sure Seeds to American gardeners and farmers. The business was in its infancy, only a few dollars invested, but a vast amount of ambition, energy and perseverance together with honesty and strict business policy of observing the Golden Rule in every transaction. Today we have the largest and best equipped mail order seed, floral and nursery business in Missouri and Archias' Sure Seeds, Plants and Supplies are famous the country over.

We are not asking to be president of the United States, not striving to improve on an air ship, an automobile or a railway train, but when it comes to sure seeds, we are right there, Johnny-on-the-spot with the best that grows and our customers may depend on getting Archias' Quality every time.

The Great European War

Has had but little effect on our business, as we have always endeavored to supply the American trade with American grown and this year we are exceptionally well prepared to meet the wonderful demand for seeds increased by the European conflict. We have not advanced prices on account of the war; however some items, such as beans, spinach, alfalfa, vetch are of short crop and the supply will be exhausted long before the planting season is over, so buy early.

Wishing one and all a Happy and Prosperous New Year, and trusting soon to receive your kind order, we remain,

Yours truly,

Archias' Seed Store Corporation

ARCHIAS' "SURE" Seeds for 1916

BEST THAT MONEY CAN BUY—SURE TO GROW—SURE TO PLEASE

They are the result of years of selection, and are procured from properly selected, cultivated and rogued fields and are as good as grow. ARCHIAS' "SURE SEEDS" have been planted for THIRTY-TWO YEARS—ARCHIAS' "SURE SEEDS" are known to almost everybody who plants seeds—ARCHIAS' TRADE MARK is on every package and is a guarantee of QUALITY.

SEED WARRANTY
Most of the failures with seeds are entirely beyond our control and they render it impossible for us to guarantee success, and therefore we want it plainly understood that while we exercise great care to have all seeds, plants and bulbs, sure and reliable, and also true to name, we do not give any warranty, express or implied, as to description, quality, productiveness or any other matter, of any seeds, bulbs or plants which we send out, and we will not in any way be responsible for the crop. No officer, agent or employ of this company is authorized to make any warranty whatsoever. If the purchaser does not accept the seeds, bulbs or plants on these conditions notify us at once and we will give instructions for disposition of same, and the money that has been paid for same to us will be promptly refunded. It is to our interest, however, to have everything of the highest quality obtainable, and several times the price that we receive for them, as it would injure us more than it would the purchaser. However, we have so much confidence in our seeds that we hereby guarantee every package, and if purchased by you is in any way defective, we will repackage, if possible, or return the price paid for the same. We are not responsible for bad weather, crop failures, etc., resulting in failure of the crop, but will do everything in our power to help you, the purchaser.

THINGS WORTH READING

WE PREPAY POSTAGE ON ALL SEEDS by the packet, ounce or pound, or fraction thereof, on receipt of price given in catalogue.

FOR HEAVY SEEDS such as Peas, Beans and Corn, add 5c per pound and 8c per quart to prepay postage. Purchaser must also pay charges on express or freight shipments.

USE OUR ORDER SHEET AND ENVELOPE when possible; write plainly and give us your complete address. Be sure to sign your Name, Postoffice, County and State every time you write us. We will furnish extra envelopes and order sheets on application.

Cash should accompany the order.

Heartily wishing one and all a HAPPY AND PROSPEROUS NEW YEAR, we remain,

Most sincerely yours,

More Kentucky Wonder Beans.

Mrs. Carter May, 1200 South Montgomery, left a nice sample of Kentucky Wonder beans at the Democrat Wednesday and today T. H. Hindman, 1908 South Lamine, brought in some beans of the same variety. All were fine, measuring 10 to 10½ inches in length. Mrs. C. W. Leftwich still holds the record for the longest bean left at the Democrat, she having grown one that measured 11 ½ inches.—From the Sedalia, Mo. Democrat, July 8, 1915.

Monett, Mo., Dec. 27, 1915.

Dear Sir: We are enclosing a picture of our little boy, 16 month's old, on a string of Archias all seed early cabbage. This picture is dim but by noting where his feet come to you can tell something of the size. It weighed 20 lbs. and 2 oz. All our cabbages were good. The finest I ever saw. All heads were extra large.

Most all our neighbors say they were the finest cabbage they ever saw and always ask us where we got the seed and we are always glad to tell them from Archias'. If you want to use this letter or picture in your catalogue you are at liberty to do so. Thanking you for all past favors we are.

Yours respectfully,

W. R. PHILLIPS.

ARCHIAS’ NEW EXTRA EARLY CABBAGE

Earliest Hard Heading Cabbage in the World. Succeeds Everywhere—The Gig Money Maker for Market Gardeners. Every plant makes a head. This new and very early cabbage, while not as large as the Jersey Wakefield, is several days earlier, and for a first early variety cannot be excelled. Solid, compact heads of conical form, dwarf and very uniform. Desirable as a quick forcing sort. Every cabbage grower should plant the Archias’ Extra Early for their first cabbage. Pkt., 10c; ½ oz., 15c; oz., 50c; 2 oz., 50c; ½ lb., 75c; ½ lb., $1.25, postpaid.

Copenhagen Market Cabbage

This new variety from Denmark will soon command the attention of those who grow for early market, as well as the private growers who desire an extra early, round headed cabbage which can be depended upon for making large, solid heads at an early season. The heads are grown upon a remarkably short stem, are sold and large in size, weighing 10 to 12 pounds, light green leaves, and of excellent quality. It is the largest of the early round-headed varieties, and its habit of growth allows of its being planted close together in the field or garden, and it matures so uniformly that the entire crop is ready for cutting at one time. Pkt., 10c; oz., 45c; ½ lb., $1.25.

Archias’ All Head Early Cabbage

ALL HEAD AND ALWAYS SURE TO HEAD

This Cabbage is a few days later than our Famous New Extra Early, but twice the size. If a gardener, or an amateur, were to plant but one variety of cabbage, he could get none that would answer all purposes as well as Archias’ “All Head.” For uniformity, reliability of heading, size, earliness and quality it has no equal. It is also very profitable, since the outer leaves are so few, a close planting can be made and 1,000 more Cabbages per acre can be grown than from seeds of other sorts. Pkt. 10c; oz., 25c; ½ lb., 75c; ½ lb., $1.25; 1 lb., $2.25, postpaid.

ARCHIAS’ DELICIOUS MUSKMELONS

CULTURE—Late in the spring drop 20 seeds in hills 5 feet apart. When up large enough thin out to three or four plants; work the same as watermelons. The following list contains none but choice varieties. Slug-shot Kills Melon Bugs. (See page 92).

Archias’ Champion Market
A well-known sort. The melons grow very uniform in size and shape, ranging from 4 to 5 lb. each; light green and rich, sweet flavor; heavy netting and handsome appearance. Pkt., 5c; oz., 10c; ½ lb., 50c; 1 lb., 90c.

Improved Early Hackensack
This valuable variety is ready for the market fully ten days ahead of the well-known Hackensack; weigh 5 to 10 lbs. each. Pkt., 5c; oz., 10c; ½ lb., 50c; 1 lb., 75c.

Burpee’s Netted Gem
This very early cantaloupe melon is one of the most delicious in the whole list. Small and round in shape. Firm, green flesh. Sweet and luscious clear to the rind. Pkt., 5c; oz., 10c; ½ lb., 50c; 1 lb., $1.00.

Rocky Ford Melon
The select Rocky Ford seed which we offer is grown in the Rocky Ford, Colo., district by a grower who raises seed only, and who we know does not ship his marketable melons, saving the culms for seed, as do many of the so-called seed growers in that region. This melon is too well known to need much description. The ideal type has a small seed cavity, thick, luscious flesh, high flavor, and can be eaten almost to the rind. Flesh is green in color, except a tinge of yellow at the center. Netting should be heavy. Pkt., 5c; oz., 15c; ½ lb., 40c; 1 lb., $1.00.

Livingston’s Tip Top
The melons are round in form, well ribbed, with light green skin, which becomes slightly netted when ripening, and average 7 inches in diameter. The flesh is quite thick, bright salmon in color and of luscious flavor. Pkt., 10c; oz., 15c; ½ lb., 40c; 1 lb., $1.50.

Osage or Miller’s Cream
The flesh is of rich salmon color, very sweet and melting in quality; very thick, almost solid. Oz., 10c; ½ lb., 50c; 1 lb., 85c.

New Muskmelon, Burrell’s Gem
It was hard to beat the Rocky Ford, and yet it has been done. The new variety has salmon flesh of unusual thickness, and a flavor that can hardly be surpassed. The flesh is 1½ to 2 inches thick, the rind is heavily netted, slightly ribbed and very thin. The melons grow to an average size of 5 inches in length and 4½ inches in diameter, and weigh about 4 pounds apiece.

They are ideal shipping melons, and notwithstanding the thin rind have stood shipment from Colorado to New York in perfection. The Burrell Gem has brought more money in the open market than any other variety. A dozen melons were picked from one hill.

We recommend this new melon very highly and encourage very extensive planting. Pkt., 10c; oz., 20c; ½ lb., 50c; 1 lb., $1.75.

Banana
Flesh quite thick and of a rich salmon color, growing from 2 to 5 feet in length; is early. Pkt., 10c; oz., 20c; ½ lb., 50c; 1 lb., $1.75.

Montreal Market
Nearly round, very shaggy, flat at the poles, skin netted and green; grows very large, often reaching 20 lbs.; flesh thick, of good flavor, very sweet. Pkt., 5c; oz., 10c; ½ lb., 25c; 1 lb., 85c.

Also the following good Melons at pkt., 5c; oz., 10c; lb., 25c; ½ lb., 40c; 1 lb., 75c. CANNON BALL, NUTMEG, TURK’S CAP, PAUL ROSE, DELMONICO, BAY VIEW, LONG YELLOW CANTALOPE, LANDRIETH’S CITRON, WINTER PINEAPPLE.

**THE TOM WATSON**

**GRAND NEW WATERMELON.** Best Quality, Fine Shape, Large Size, Good Naph—The "Tom Watson" is an extra long melon of attractive appearance, uniform in shape and quality; the juicy crimson flesh is "as sweet as honey," melting, and of superb flavor. The average melon will weigh 15 to 40 lbs. and measures about 25 inches long and about 12 inches in diameter. The skin is dark green, with thick netting all over, quite distinct from other varieties. It originated in Georgia, a state noted for producing fine watermelons, and this new variety is a good example of what a first-class watermelon should be. Its appearance and quality strongly recommend it both for home use and for market. Sure to take a leading place with large melon growers and shippers. My choice seed was grown on Rockford Seed Farm under the most painstaking care and selection, and I honestly believe it to be a great improvement over our original planting stock secured direct from the introducer. Pkt., 10¢; oz., 15¢; 2 oz., 35¢; ½ lb., 65¢; 1 lb., $1.85.

One of the most popular market and shipping varieties. Grown very extensively in the South for Northern markets, and is today the favorite variety with the watermelon growers of New Jersey, who supply the Philadelphia and New York markets. It keeps well and seldom cracks or splits in transit. Its flesh is a beautiful shade of dark red, deliciously sweet, heart large, and the edible flesh extends very close to the dark outer rind. Melons very uniform in size and shape. Pkt., 5¢; oz., 10¢; ½ lb., 25¢; 1 lb., 85¢.

**McIVER'S WONDERFUL SUGAR**

**CULTURE**—Watermelons do best on light, well-drained soils. The hills should be 3 feet apart each way, with some well-rotted manure in each hill, thoroughly incorporated with the soil. Plant the seed as soon as the weather is really warm and settled. One ounce of seed will plant 30 hills; 2 or 3 lbs. of seed to the acre. Allow 2 or 3 plants in each hill.
CULTURE Onion seed should be sown as soon as possible in the spring, even if the weather is cold, just so
the soil works up well. This gives the onion a good start and ahead of weeds and before dry
weather sets in. After thoroughly pulverizing the soil sow 4 to 6 pounds to the acre in drills 1 foot apart
and about 1 inch deep. When 4 inches high thin out to stand 2 to 4 inches apart in rows, keeping them well weeded and
free from weeds. Onions delight in rich, deep, sandy loam and succeed well if grown for a succession of years on the
same ground. Deep plowing prevents blight.

In feeding value it ranks higher than red clover or timothy hay. Once a good stand is secured it will last from ten to fifteen years, gives three to six cuttings per year, yielding from three to four tons per acre. Grows in rich, moist loam or sandy soil, having a deep subsoil. Prepare the land thoroughly and sow seed at the rate of 15 to 20 pounds per acre, with a broadcaster or grass seeder. Cover with a brush or light harrow. Young plants are quite tender, and the land must be free from weeds until they become established. 10 lbs., $1.25; 100 lbs., $12.50. Add 10c per lb. if wanted sent by mail. Inoculation of this seed is absolutely necessary for the best results of the crop.

Ask the Agricultural Department at Washington to send you Bulletins Nos. 105, 56, 135, 215, 97, 259, 194, 124, 153, 267, from which you can secure information respecting this wonderful seed. No other seed is attracting the attention alfalfa seed is this year.

SUDAN GRASS—A New Forage Crop of Immense Value to the Middle West

The U. S. Department of Agriculture introduced this new forage plant into the United States in 1909, the seed being brought from Sudan, Egypt, and seed produced was distributed the following year to experiment stations of the different states. The fifth crop has been grown in the United States under widely varying climatic conditions. The results have been so satisfactory that it is now established as one of our permanent forage crops.

Sudan is a tall, annual grass, reaching a height of from seven to nine feet when planted in rows and allowed to mature for a seed crop; broadcasted and cut in the “knot” for hay, about four feet.

The hay is softer than Johnson Grass or sorghum, the stems are smaller and more leafy. It is, however, entirely different being strictly an annual, hence not spreading like Johnson Grass. It dies each year and produces a new crop every spring, and must be seeded each spring. It stools very freely, throwing out many stems from one crown.

It is easily cured and handled as a hay crop. Stock of all kinds eat it readily and will leave any other hay for it.

For a seed crop plant 2 lbs. seed per acre in rows 36 inches apart. For hay crop broadcast or drill 12 to 20 lbs. to acre. Yields 500 to 1,000 lbs. seed or three tons cured hay per cutting per acre with three cuttings per season. Price, 25c per lb., postpaid. Net postpaid, 10 lbs., 25c; 5 lbs., $1.00; 10 lbs., $1.75. Special price on 100-lb. lots.

Not less than one bushel crate sold, as we cannot break crate. Remember, our ear corn is positively no better than shelled corn, and you lose the shrinkage. It will cost you more freight. However, the expense is also greater to us to select, crate and store corn on the cob.

NOTE—Our crates are made solid this season. The corn is carefully wrapped and packed in solid crates, which prevents loss by mice and damage in transit. Our shelled corn is packed in good, new bags, insuring safety in shipping, and should reach you in good order.

An all-round profitable corn for the farmer, whether grown for market or for feeding. No corn grower will make a mistake in planting Archias’ Missouri Pride. As our stock is limited would advise ordering early. Price of Archias’ Missouri Pride, per packet, 10c; per pound, by mail, prepaid, 25c. Improved Leaming

A quick growing yellow variety, highly esteemed by those who have grown it. It usually produces two ears to the stalk. It is one of the seven varieties recognized by the Illinois Experiment Station, where it has been first in yield and more times than any other variety. The Improved Leaming has been selected for a richer color—a beautiful brownish yellow—a deeper and somewhat rougher kernel. The ears average about 10 inches long and weigh three-fourths to one pound each. The stalks are of medium height, with many broad leaves, making it one of the best sorts of ensilage and fodder. Numerous tests at the experiment station show it high in protein and oil content, making it valuable to the live stock grower and feeder. By mail postpaid, lb., 25c; 5 lbs., 60c. WHITE VARIETIES

Johnson County White Dent

The Grand Sweepstakes Corn of America

Ever since the National Corn Exposition at Chicago, fall of 1897, the agricultural papers have had a great deal to say about this wonderful corn from Indiana, that netted its owner, Mr. L. B. Clor, a total of $7,538.50 in cash and special prizes. Johnson County White Dent is a fixed, semi-earless, semi-white corn, adapted to all the corn belt.

The shape of the ear is cylindrical, slightly tapering; white kernel and cob; tips of ears fill well, a large per cent being completely covered with grain; butts deeply rounded, with medium shank; kernels uniform and wedge-shaped; ears averaging about 10 inches in length.

Our stock is Missouri grown, one year from the originator. By mail, postpaid, 1 lb., $2.50; 3 lbs., 60c. By freight or express, 1 qt., 15c; 4 qts., 50c; 1 pk., 85c; ½ bu., $1.50; 1 bu., $2.75; 2 bu., $3.00; 5 bu., $4.00; 10 bu., $6.00. Sack free.

St. Charles White

A valuable sort for ensilage, owing to its heavy growth. Grains are pearly white, deep and set on red cob with 18 to 20 rows. Weight of ear 15 to 18 ounces. No more popular or better corn grown. Best corn for the South.

By mail, postpaid, 1 lb., 25c; 3 lbs., 60c. By freight or express, qt., 10c; pk., 75c; ½ bu., $1.40; bu., $2.50; 2 bu., $4.75; 5 bu., $11.00; 10 bu., $20.00. Sacked free.

Boone County White

A pure bred white corn of very large size and high fattening and milling qualities. It is rather a late variety, maturing in from 115 to 120 days, and cannot be recommended for planting north of Missouri and Kansas. Per general planting throughout this state and farther South it will give highly satisfactory results all soils and seasons. Years of scientific breeding and patient selection have developed this variety into the largest yielding white corn known.

A very large, fat, heavy ear, tapering only slightly from butt to tip, rounding off nicely within an inch of the top; 15 to 20 rows of about 50 kernels each, carried out to the full length of the ear.

Tips and butts that are exceptionally well filled out; the entire surface of the cob is completely covered with a solid layer of grains one-half to three-quarters of an inch deep.

White cob of medium size, which, together with its depth of grain, gives it a remarkably high selling percentage. Don’t fail to try it. By mail, postpaid, 1 lb., 25c. By freight or express, qt., 10c; pk., 75c; ½ bu., $1.25; bu., $2.25; 2 bu., $4.50; 5 bu., $10.00; 10 bu., $19.00. Sacked free.

Hickory King

Hickory King is a white variety of field corn which has the largest grains with the smallest cob of any corn in existence. The grains are so large and the cobs so extremely small that when the ear is broken in two pieces a single grain will cover completely the cob section. This corn is of very vigorous habits, is a splendid and sure cropper, is especially well suited to light or thin soil, and is a very desirable variety.

Produces 2 to 3 ears per stalk; matures in 110 days. Qt., 20c; pk., 75c; bu., $2.75; 2 bu., $5.00.

Iowa Silver Mine

It is a pure white corn, with large ears, often measuring 10 to 11 inches in length and weighing as high as 1½ pounds each. Kernels are of unusual length, usually rough at the outer ends, and ears are splendidly filled out at the tips. The corn matures in about 100 days.

ARCHIAS’ SPECKLED BEAUTY CORN

Introduced by us in 1892 and the past season has made a wonderful record. It is an improved strain of the old strawberry. If you are a feeder you will do well to get a start in this great yielding, great feeding corn. It holds a warm place in the hearts of corn producers. Ears are from 10 to 12 inches long, deep grain, medium cob, medium rough, two good ears to the stalk, many ears weighing over a pound and no small ears. Yields 135 bushels to the acre. Rich in oil and protein, easily masticated by cattle, roots large, stalks strong and thrifty. Try it. You can’t afford to be without some of this variety if you are a feeder. It makes heavy yields and is strong in germination. You should include some of this in your early corn. It is a fertile land corn, and will produce mammoth crops in any good corn land. A guaranteed success. Do not fail to plant it if you wish a big yield and finest quality. Matures in 110 days. As its name implies, it’s a beauty, and will please you.

HOW TO MAKE A HOT BED

Select a well-drained spot and make the pile of manure 15 to 18 inches deep; or a foot of soil may be dug out and filled in with manure well tramped down. Place the frame on it. Keep a thermometer in the bed, and when the temperature falls to 75 degrees below 50 at night. With a hot bed the amateur can start almost any kind of vegetable or flower seed. By sowing such vegetables as egg plant, pepper, tomatoes, etc., and such flowers as bachelor's button, scarlet sage, vinca, verbenas, etc., alongside in March it is possible to have nice, stocky plants ready to set out as soon as the weather conditions are favorable, ensuring early returns from the vegetables and a long season for the flowers.

Etoile de France, or Star of France—A brilliant shade of clear, red-crimson velvet, centering to vivid cerise; large flowers on long, stiff stems; remarkably vigorous, free-blooming and hardy. Killarney—This is the great Irish rose, raised by an Irishman at Belfast, Ireland, and it will be many days before its beautiful color is surpassed. It is as beautiful in the way of a rose as the Lakes of Killarney are as to a body of water. Clear, deep, rich shell-pink; some describe it as crushed, strawberry color.

Killarney—Pure white sport from the pink parent, the newest thing in a flowering rose, admitted to be a strong competitor of the Irish. Our stock is of the true Waban strain.

La France—Silverly-rose, with pink shades and satiny-like petals of unsurpassable beauty; large, symmetrical and deliciously fragrant blooms from June until frost; hard with protection.

Manon Coche—Ritch, rosy-pink, shaded silverly-rose on outer petals, exquisite in color and graceful in form from bud to bloom and delightfully fragrant; beautiful, healthy foliage and long, strong stems. Unquestionably the queen of pink tea roses and a leading cut-flower variety.

ARCHIAC'S CHAMPION ROSE COLLECTION

See Cover Illustrations

Champion of the World—The color is rich, rosy pink; the flowers large, full and double and deliciously sweet. Produces an abundance of bloom throughout the season. The champion everbloomer.

Sunburst—A truly great rose which is now classed with the American Beauty and Killarney. It rivals Mrs. Aaron Ward, being a rich, cupperry yellow of good size and form. Is a strong grower and having long, strong stems is very fine for cut-flowers.

Princess Bonnie—Similar to Richmond in color, but far richer in the bud. Large and double, opening perfectly at all seasons of the year. In form and fragrance it resembles General Jacquemino. Strong and sturdy in habit, with excellent foliage. Is strongly recommended for these qualities and also for its great productiveness and wonderful keeping qualities. Price of either of the above roses: Strong 2-year-old plants, each, 55c; or 3 for $1.00; 6 for $1.75; 12 for $3.00, postpaid.

My Maryland

A grand cut flower bedding rose, with the general habit and coloring of Killarney, but showing a more decided rose-pink. Good free-branching, clean-foliaged sort of the practical type which gives flowers all the time. Price, 2-year plants 55c each; 3 for $1.00, postpaid.

Climbing American Beauty

A new rose of wonderful beauty and merit. A cross between the American Beauty and an unnamed seedling. Color rose crimson, identical with its pollen parent, American Beauty, and with the same exquisites fragrance, a quality rarely found in climbing roses. Of strong habit of growth, making shoots from ten to fifteen feet in one season; hardy as an oak. Will thrive and bloom in almost any situation where a pillar rose is desired. The foliage is large, deep green and entirely free from black spot or mildew. One of the finest roses to bloom in the spring. Comes into flower with us the latter part of May and the first week in June, and continues in full flower for a month or more, with occasional bloom during the growing season; the plants, with us, having buds and flowers when nipped by frost in November. Price, strong 2-year plants, each, 40c; 2 for 75c, postpaid.

Everbearing Strawberries “Superb”

You can have strawberries just as easily in the spring by planting the Superb Strawberries. These varieties will produce heavy crops in the fall, of as fine berries as any spring-ripening strawberries. Truly a luxury for home and profitable for market. Think of having all the berries you can use on your table during the months of September, October and November and later, if not killed by freezing weather.

If you grow them to sell you can get your own price for strawberries at that season of the year and there is no strawberry known that is so prolific as “Superb.” They commence blooming early in the spring and the blooms should be kept removed until about the middle of August. By doing this you get a larger yield in the fall than you would if allowed to bear all summer. So prolific are they that the young plants that are formed in the summer will bear in the fall of the same year; in fact, the young plants will very often send up fruit stems before they become rooted. They are not a novelty nor an experiment, but are a success and you can have strawberries as well in the fall as in the spring—strawberries of good quality for your table every day during the late summer and fall; strawberries for Thanksgiving. Many who read this have no doubt heard of fall-bearing strawberries. Many have not. Remember we are living in an age of rapid advancement that is giving us things that a few years ago we never thought of.

You should plant some of these, the latest thing in the strawberry world. You will have to do this in order to stay up with the crowd, and you want to do that. The IOWA and SUPERB are the leaders and are considered the most successful of all the fall-bearing strawberries, heavy bearers and splendid fruit of good quality and size, plants hardy and robust.

Price of “Superb” Everbearing Strawberries, 12 for 40c; 25 for 65c; 50 for $1.00; 100 for $1.75, prepaid.

Easily handled by a woman. Lamp is readily removable for cleaning, trimming wick and refilling without disturbing the chicks and without kneeling. Can be replaced by operator in a moment's time with same degree of ease.

**Cycle Hatcher, Holds 50 Eggs**

Constructed entirely of metal; self-regulating; requires no moisture; will not warp, shrink or crack; will last a lifetime. Hatches hen, duck, goose and turkey eggs equally well. $6.00.

**Brooder-Hatcher, Holds 50 Eggs**

We have the agency for Mr. Johnson's machines and sell them at factory prices. We pay the freight, ship promptly, and guarantee every machine to be as represented. Best material and construction of case; the best non-conducting walls, lid and bottom ever put in incubator construction. Not a particle of any other material used; even the legs are built of heavy metal. The asbestos insulation and the redwood inner case completes the ideal. Convenient Thermometer holder, simplicity of regulator—a single adjusting nut sets the regulator, the set nut outside of incubator, and when once adjusted it stays right and sets the temperature to any fraction of one degree. The Up-to-Date Sanitary Brood Coop

For successful chicken raising it is necessary to protect the young brood from rats, cats, mink, weasel and other pests. This can be done by using the Up-to-Date Brood Coop, the most successful coop on the market. It is sanitary, no bugs or insects of any kind can live in it; has ventilated top and end. Our top ventilation gives a circulation of air through the coop and keeps it from getting hot on the inside. It has three doors, one wire screen door, one slatted door to allow the little chicks to pass in and out and one storm door to close in case of rain. They work in a pivot and cannot be forced open by the old hen. They are shipped knocked down and will go at fourth class freight. Size about 18 inches high, 18 inches wide and 24 inches long; our price, each, $4.75; 6 for $10.00; 12 for $19.00.

Trap Nests

We have two of the best makes of trap nests. Catalogue and prices on application.

Archias "Sure" Exhibition Coops

A thoroughly satisfactory exhibition coop that embodies the qualities of durability, neatness and practicability, has been much in demand. We believe that we have solved the problem in the construction of the Sure Exhibition Coop. The framework is made of the most substantial material covered with canvas. The rods in front do not obstruct the view like wire. It has a door sliding up and down. Single coop measures 2 feet wide, 2 feet deep and 2½ feet high. Double coop measures 4½ feet wide, 2 feet deep and 2½ feet high. These coops are shipped "knocked down." Price, single coop, $2.50; double coop, $3.50.

Eyrle Corrugated Paper Shipping Coops

The strength of the Eyrle Coop is such that it will bear any amount of weight and is perfectly safe, having been accepted by the express companies on the same basis as the wooden coop. Made in four sizes, for single birds, pairs, trios and breeding pens.

THE “IDEAL” OATS SPROUTER AND SANITARY HOVER

IMPORTANT TO REMEMBER

That quickly-sprouted oats make the best of green food for chickens.
That 12 quarts of oats can be sprouted at one time under the
International Sanitary Hover.
That 12 quarts of oats sprouted under the International
Sanitary Hover will yield in eight days enough green food to
feed 500 laying hens for three days.
That letting the sprouts grow for eight days doubles the
yield of green food over the yield for the sixth day.
That instead of having to exercise his hovers during the fall
and winter months, the user of sanitary hovers can work them
the year around—as broodsmen in brooding time, as oat sprouters
when other hovers are idle.

That oats must be soaked over night in lukewarm water
before being placed under the hover.

That the curtain must positively be left on the hover during
the first three days to hold the heat about the oats.

That the sanitary hover, considered merely as an oat sprout-
er, will pay for itself many times over.

ACCORDING to customers, after storing for a season with the
Sanitary Hover, have written to us that they would not sell it
at any price if they could not get repeat orders.

Every machine fully warranted.
